

Product Parameters

HYDRAULIC BENDING MACHINE

CB-200B

Model	CB-200B	Thickness of plate	12mm
Tonnage	20T	Breadth	200mm
Weight	26Kg		
Product features	Bending copper row into aluminum row bending Angle of 90° below, no damage to the copper material; This product can be lifted, when bending the long copper bar, N or L type can be removed, the whole row can be taken out without hindrance; The design has an Angle of 90°, 45° indication to avoid excessive; Bending copper row must pay attention to the central position of the copper row, must be aligned with the scale 0°; With CP-700, DYB-63A and other hydraulic pump use;		

Product Detail

Product Detail Presentation

Male connector + dust cap **1**

Precise and convenient connection, effectively prevent dust

Focus on the center of the piston **2**

When bending the copper and aluminum bars, adjust the limit device according to the width of the copper bars so that the center of the copper bars is aligned with the center of the piston before bending

Equipped with scale indication **3**

With scale indication, more convenient bending

Requires hand pump or electric pump **4**

This product does not come with a pump and needs to be purchased separately
