

Product Parameters

Hydraulic Cable Cutter Labor saving and high efficiency CPC-95

Suitable for cutting of various materials
Our products are used in power industry, copper aluminum armored cable cutting operations. It is a necessary tool for power engineering operation. Our products are light, corrosion-resistant, labor-saving and efficient.

Model	CPC-95	Length	785mm
Output	10T	Weight	approx. 10.6Kg
Cutting Range	Cu-Al armored cable $\leq \phi 95\text{mm}$		

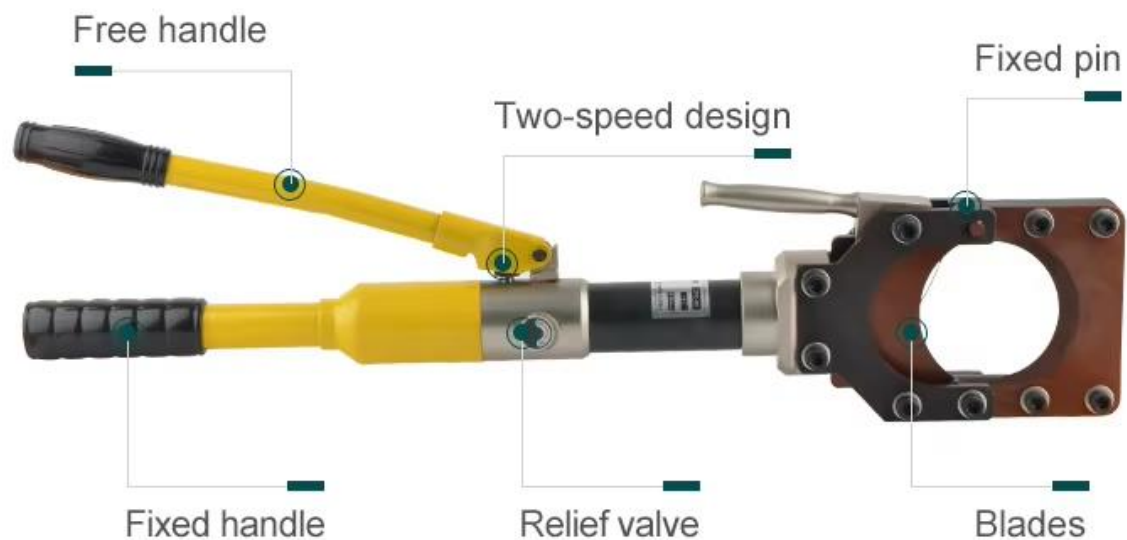

Product Size

Unit: Millimeter (mm)

Product Detail

01 Spring steel blades

The blade is quenched. It is high strength and durable

Easy to disassemble

02

Buckle hook-knife head can open conveniently, cables can be put in any position for cutting

03 Humanized Design of handle

Is a humanization of valuing person inspiring person design process

Pump piston

04

Hard chromium and polish processing makes it wear-resistant and smooth which is not easy to leak.

05 Relief valve

Well design relief valve is more labor-saving. It is easy to use too.

Handles

06

The handle is painted with bright and beautiful color. Rubber covered handles feels comfortable.
